

Virus & Malicious Code

Anti-virus Software, Malicious Code Detection Tools and Internet Security Suites

Anti-virus software and malicious code detection tools are commonly used to protect information systems from malicious attacks. To prevent unauthorised access or attack from internet, firewall is introduced to control the network traffic between the computers and the Internet. By integrating the firewall and the anti-virus software, Internet security suites are introduced in the market to provide higher protection against cyber attacks. The following are lists of anti-virus software, malicious code detection tools and Internet security suites offering on different platforms including Windows, Linux/Unix, Mac and mobile, in free or with certain conditions for your reference.

It is important to note that the use of related commercial software is subject to respective terms of use. Please go through the instructions, terms and conditions and related information. You should fully understand and agree with the license agreement before downloading and using the software. Some software or services may be free of charge when used for non-commercial purposes, but a charge may apply if the tool is used by a commercial organisation or for commercial purpose. If in doubt, clarify with the vendor or supplier before installation.

In addition, you should monitor for any software vulnerabilities or security advisories announced by the vendor, and apply all necessary patches or security measures promptly in order to protect your computer.

It is not an exhaustive list of anti-virus products, malicious code detection tools and Internet security suites. All the products are listed for reference only and should NOT be regarded as recommended or approved products. The products / services referenced in this site are provided by parties other than HKSARG. HKSARG makes no representations regarding either the products / services or any information about the products / services. Any questions, complaints, or claims regarding the products/services must be directed to the appropriate vendor or suppliers.
